Specialized skills and Tools

Specialized skills

- Provisioning infra using Terraform.
- AI-driven observability and anomaly detection (AIOps).
- Implemented AI-powered automation and self-healing workflows for operational efficiency.
- Predictive analytics for capacity planning.
- Performance Tuning and Optimization
- Disaster Recovery and High Availability
- Configuration Management and Deployment- Ansible
- Monitoring, Logging and Observability
- CI/CD and Automation
- Migrating monolithic application to Containerization and Orchestration based model
- Security and Vulnerability Management
- Ticketing, Documentation and Collaboration tools
- On call Production support & IT operations Troubleshooting and Debugging

Tools

CI/CD Tools: Jenkins, Harness CI/CD, Argo CD

AIOps & AI Tools: Dynatrace Davis AI, Splunk ML Toolkit, AWS DevOps Guru, Azure Monitor AI Insights

Operating Systems: Linux and Windows

Servers & Web: NGINX, Apache HTTP, Apache Tomcat, JBoss

Cloud Services: AWS, GCP & Azure CI/CD

Configuration & Infrastructure Management

Tools: Ansible, Ansible Tower, Terraform

Container Technology: Docker, Docker-

Compose, Kubernetes, Helm **Database:**

PostgreSQL, MySQL, RDS

Profile

DevOps/SRE Engineer with 7+ years of experience in managing and optimizing cloud operations across **AWS, Azure, and GCP**. Skilled in **Infrastructure as Code (Terraform, Ansible)**, **container orchestration (Kubernetes)**, and **cloud monitoring/alerting**, ensuring reliability, security, and performance of cloud environments.

Experienced in leveraging **AIOps and AI-driven observability** for proactive incident detection, anomaly detection, and predictive analytics in complex cloud ecosystems.

Proven track record in **performance optimization, disaster recovery, and security compliance** across banking, telecom, and e-commerce domains. Adept at driving automation, reducing **MTTR**, and improving operational efficiency through strategic planning and advanced monitoring frameworks.

Work Experience

Team Leader

SLK Software

01/2025 – Present

Client: Emerson, Fifth Third Bank, HNB bank | Bengaluru

Emerson

- Built end-to-end **observability** for Azure workloads using **Managed Prometheus, Grafana, Azure Monitor**; **MTTR ↓25%**, false alerts **↓30%**.
- Built predictive capacity checks (CPU/memory/pod utilization) with Kusto + Python.
- Designed monitoring for **AKS, PostgreSQL**, and HTTP endpoints with **SLO/SLA** dashboards and actionable alerting.
- Delivered infrastructure changes via **Terraform & Ansible** with standardized modules, approvals, and guardrails to improve release safety.
- Collaborated with product owners & platform teams to define **golden signals** and operational readiness checklists for new services.

Fifth Third Bank

- Automated **OS patching & deployments** with **Ansible + Jenkins**; manual effort **↓70%**, lead time **↑40%**.
- Enabled event correlation and auto-baselining in Dynatrace, **cutting P1/P2 incidents by ~20%** and speeding triage by ~40%.
- Used Splunk MLTK for log-pattern drift detection to **reduce MTTD by ~25–30%**.

Monitoring & Logging Tools: Grafana, Prometheus, Netdiagnostic, Splunk, ELK Stack, Dynatrace, Google Cloud Monitoring, Amazon CloudWatch, ThousandEyes

Security and Vulnerability: SonarQube, Rapid7 Nexpose, CrowdStrike Falcon

Ticketing Tools: JSM, ServiceNow

Version Control: GitHub, GitLab

Incident Management & Automation: PagerDuty, Opsgenie, StackStorm, Shell scripting

Artifact & Image Management: Docker Trusted Registry (DTR), Harbor, Nexus

Messaging & Streaming: RabbitMQ, ActiveMQ, Kafka

Documentation & Collaboration: Confluence, SharePoint, Google Workspace, Microsoft Teams + OneNote

VPN Solutions: Libreswan, StrongSwan

Education

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

08/2014 – 07/2018 | Ghaziabad, U.P

Ideal Institute of Technology

Percentage: **73%**

- Introduced **runbooks** and **incident response** playbooks with **PagerDuty/Opsgenie**, improving on-call consistency and time to mitigation.

HNB Bank

- Orchestrated event-driven remediation (PowerShell/Ansible) triggered by anomaly signals, **lowering manual toil by ~30%**.
- Applied **OS hardening & patch compliance** for cloud and on-prem nodes aligned to **CIS** baselines; improved audit scores to **95%+**.
- Expanded **Dynatrace & Splunk** dashboards with threshold tuning and business KPIs; improved signal-to-noise ratio for alerting.
- Managed **GKE** deployments with **HPA/VPA**, resource governance, and secure ingress/egress; improved stability and cost efficiency.

POC

- Implemented **AI-driven incident summary** generation using Splunk ML Toolkit for faster RCA
- Led POC for **SLK Direct** to accelerate SRE journey: aggregated data from **Dynatrace & ServiceNow**, built unified ops views and workflows.
- Integrated **AWX** for **event automation** and self-service ops; reduced manual interventions across incident & change processes.
- Built POCs with **Harness** (CI/CD), showcasing automated build/deploy, progressive delivery, and policy checks.
- Evaluated **Nagios, Thousand Eyes, New Relic** for infra/network/app performance; produced comparative findings and adoption recommendations.

Software Engineer

Impetus Technologies

05/2021 – 12/2024 | Client: Transunion | Noida

- Migrated legacy monoliths to **Kubernetes microservices** (Docker + GKE), improved scalability, resilience, and release velocity.
- **Cloud networking & security:** Designed **VPC/VNet** with private subnets, secure ingress (**ALB/App Gateway**), controlled egress (**NAT/Firewall**); removed public exposure for core services.
- Implemented **IAM/RBAC & secrets management** (**AWS KMS / GCP Secret Manager**) integrated with CI/CD; enforced least privilege and automated key rotation.
- Implemented production-grade **CI/CD pipelines** using Jenkins, incorporating blue/green and canary deployments, reducing rollback frequency by 30%.

- Developed **Ansible Playbooks** to automate software provisioning, deployment, configuration updates, and system maintenance, reducing manual intervention.
- Tuned **HPA/VPA** and resource requests/limits; lowered compute costs by **~20%** while meeting p95 latency targets.
- Standardized **Terraform modules** for network, compute, and Kubernetes add-ons; cut provisioning time by **~80%** and improved reproducibility.
- Leveraged **Splunk/ELK** for log analytics with custom dashboards; accelerated troubleshooting and reduced mean time to detect.
- Conducted **vulnerability assessments** and applied necessary patches to mitigate security risks and ensure compliance.
- Utilized **Prometheus, Grafana, and Dynatrace** for real-time monitoring and alerting, enabling proactive system management and performance optimization.
- Configured and deployed **VPN solutions** for customers using **Libreswan and StrongSwan**.
- Migrated VMWare to AWS; used EC2, ELB, S3, RDS.
- Managed customer tickets and provided **Oncall supports** for alerts, ensuring timely resolution and customer satisfaction.
- Mitigated **security risks** by conducting regular vulnerability assessments and applying necessary patches.

Software Engineer

Cavisson Systems

10/2018 – 03/2021 | Client: Kohl's | Noida

- Implemented robust **monitoring (APM,) and alerting tools** to reduce system downtime for critical applications.
- Performed **performance testing, monitoring, and diagnostics** to optimize enterprise app reliability and throughput.
- Implemented **Jenkins CI/CD** pipelines for build/test/deploy, improved automation and release cadence.
- Provisioned environments using **Terraform**; established logging/monitoring baselines and monthly patch workflows.
- Containerized workloads with **Docker/Docker-Compose**; streamlined packaging and deployment.
- Managed configuration, change, release, and build processes on **Linux**, maintaining system integrity and uptime.
- Worked with software development and testing team members to design and develop robust solutions to meet **client requirements** for functionality, scalability, and performance.
